Full Stack Software Developer

[Lincoln Deployed](#)
Full-time, Competitive Compensation & Benefits
Location: US Resident, All Remote Work

Job Description

Lincoln Deployed is seeking a strong technical generalist who will be directly developing and deploying client projects as well as providing technical guidance and assistance to other engineers.

Our projects span from responsive web to native mobile, from consumer B2C to enterprise B2B, so the ideal candidate will enjoy a lot of variety, and must have the ability to operate seamlessly across multiple projects.

We operate like a fast-growing startup, so this role offers the opportunity to constantly develop new skills, be a self-starter, explore new target markets, and strongly influence product direction. See the *About Lincoln Deployed* section below for more about our culture.

Requirements

- 4+ years as a full-stack developer
- Strong understanding of fundamental web concepts (client/server relationships, RESTful APIs, JS, HTML/CSS, etc)
- Experience with the full web development process, from concept to development to deployment to assessment
- Familiar with lean/agile development methodologies
- Comfortable with developer collaboration workflows like Git
- Self-sufficient and self-reliant
- Strong communication skills

About Lincoln Deployed - CallDeployed.com

What if you could rebuild Accenture today?

Join the Seal team 6 for all things organizational design, product and tech for civics & politics.

More directly, a full service consultancy that focuses on working with amazing civic and government partners to advance liberty.

We are building a high output consultancy of product gurus to helicopter into aligned organizations with product and technical challenges, diagnose those issues, design solutions and execute against them. As a new startup we are looking for professionals who we can feel comfortable putting in front of a partner and having them manage consulting engagement end to end with minimal oversight.

Working alongside you, our nationwide community of exceptional technology professionals will provide on-demand expertise and hands-on assistance that will enhance your capacity to execute at the highest level. Together, we can accelerate the shift away from a predatory "beltway bandit" model and ensure that the American people benefit from technology worthy of the $100+ Billion spent annually on it.

We offer a nice benefits package to employees, in addition to competitive salaries and the convenience of working from anywhere. Benefits include health/dental/vision insurance, 401K, tax-advantaged bonus structure, and a flexible vacation policy.

Interested? Here's what to do next...
